Seyon Track enable Machine-to-Machine (M2M) and Enterprise Mobility solutions and platform to power the Internet of Things (IoT) that remotely track, monitor, and control fixed and mobile assets. We help enterprises with planning and distribution of resources, automate routing and dispatch to save cost.

## SOLUTIONS

### MARINE TRACKING

SEYON TRACK is ideal for all your marine or GPS boat tracking needs.

SEYON TRACK offer a robust Satellite Tracking solution for Vehicles and equipment deployed to remote areas, out of cellular coverage.

### AVIATION TRACKING

Our Products and service platforms are configured to fit the exacting technical specifications and operational requirements of each customer.

### CONSTRUCTION & HEAVY EQUIPMENT TRACKING

SEYON TRACK provides GPS based Heavy Equipments tracking system.

### FLEET MANAGEMENT SOLUTION

SEYON TRACK offers real time GPS vehicle tracking solution.

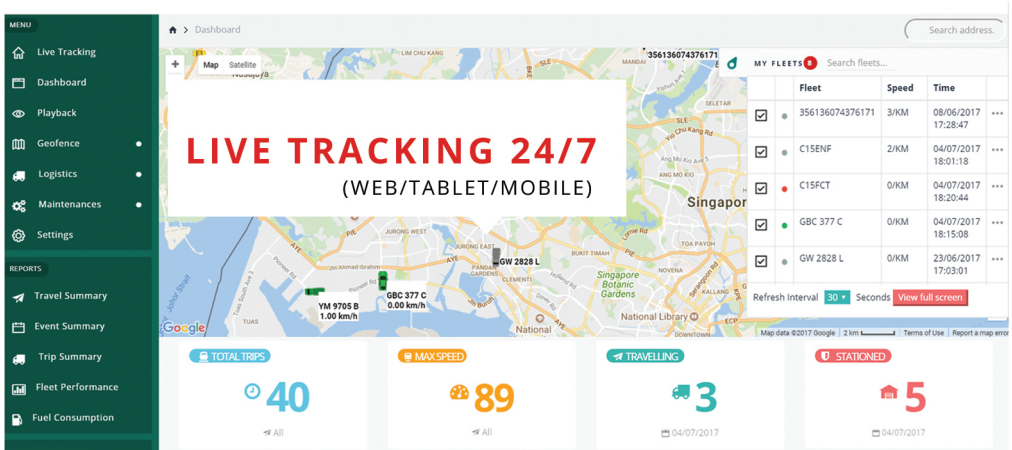

### CARGO & LOGISTICS MANAGEMENT

SEYON TRACK Tracking system helps significantly improve trailer-to-tractor rations, effectively increasing the productivity.

### MOBILE WORKFORCE MANAGEMENT SOLUTION

SEYON TRACK provides smartphone based as well as portable hardware solution to help companies to manage their mobile workforce.

- GSM Network Usage

## INDUSTRIES

### Transportation & Distribution

AMANA provides connectivity, enabling remote monitoring and tracking of vehicles, trailers, reefers, containers, secure cargo and more.

### Heavy Equipment

AMANA's leading-edge telematics devices and powerful web applications support the complete value chain, from OEMs to dealers and fleetowners.

### Maritime

AMANA provides critical near real-time vessel monitoring, ocean buoy tracking and AIS ship tracking for commercial fishing boats and merchant fleets travelling globally.

### Oil & Gas/Utilities

AMANA devices and solutions monitor sensors, telemetry systems, oil production, track and communicate with remote workers, secure cargo and more

### Aviation/Government

SEYON TRACK-enabled monitoring devices are uniquely positioned to serve government agencies, protecting people and vital assets while enabling mission-critical communications.
